

How to make business to business (B2B) payments

1. Tap **Pay** on the bottom of the wallet home screen.

2. There are three ways in which to send a payment to a business:
 - **Invoice QR Code**–If the merchant to whom you are sending money has generated a QR code, you can simply scan the code with your mobile device.
 - **Paste the Invoice Code**–If you’ve received the payment code of the recipient (via text message or another app), you can either tap the link, or copy and paste it into the app.
 - **Enter the Invoice Payment Code Manually**–To type the payment code yourself, tap **Enter Code Manually**.
3. After you scan the invoice QR code, tap the invoice link, or manually enter the code, tap **Continue**, then enter the amount of the payment
4. Tap **Continue** again.
5. On the **Review Payment** screen, make sure that the recipient and amount of the payment are correct, and add an **Optional Note**.

6. **Slide to Send** the money.
